This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. THE JOHN CRERAR LIBRARY

A LIST OF BIBLIOGRAPHIES OF SPECIAL SUBJECTS

JULY, 1902

CHICAGO
PRINTED BY ORDER OF THE BOARD OF DIRECTORS
1902

UNIVERSITY OF CALIFORNIA
LIBRARY

PREFACE

The present list, the third of this Library's bibliographical publications, is intended to make available the resources of the Library in the field of subject bibliography so far as they are brought out in its classed subject catalogue. Its scope is, of course, that of the Library, and includes the social, physical and natural sciences and their applications. It gives not only the distinctively bibliographical works on each subject, whether periodicals or monographs, but also works which contain bibliographical material thought to be of interest either because of the number of titles given or the minuteness of the subject treated. It includes also general indexes to periodicals covering more than two years, whether the periodicals themselves contain bibliographical material or not, and the catalogues of special libraries, which often are valuable as bibliographies. The most serious omission is that of analytical references to articles in periodicals and other serials.

The inclusion of any given title must be a matter of judgment and this is particularly so in the case of periodicals. Very many of them devote a section to bibliography which varies from such a degree of fulness as to make the periodical one of bibliography in all but name, to a mere "Table of contents of other periodicals" or "List of books received for review." At first the line was drawn more strictly in periodicals than in books and even the periodicals devoted to abstracts were omitted, but upon reconsideration it was decided to make the list more complete. When this decision was made a large part of the volume had been printed, so that a considerable number of such titles are included in the ADDITIONS, page 421, which also contain the new titles prepared since the printing of the list was begun. Although it has been printed in sections of eight pages, occasionally the same title has been required in two places within the same section; in such cases the more important place has been selected for the main list, and the omitted title has been inserted in the other place in the ADDITIONS.

The arrangement of the list is the same as that of the section **016** of the classed catalogue, and it contains practically all entries in this section. The order within each smallest subdivision is chronological, the latest work being put first, but as only the more important of these subdivisions could be given in the headings, though all are brought out in the index, the reasons for arrangement under each heading are not always evident. Peculiarities of typographical arrangement have been determined largely by the previous use of the same matter on printed catalogue cards, the type for which has been electrotyped. Inconsistencies in the form of entry are

70308

due to the fact that it has not always seemed necessary to reprint the titles when a change in form has been made.

The index gives in one alphabetical arrangement names of persons, places and institutions, titles, and subjects. The name and title references have been made quite full, but the subject references refer only to the bibliographical material.
